

POSTCARD *from the* FUTURE!

You know what I'm sick of? Having people in the present day try and tell me what tomorrow will be like. I want people from the future to tell me about their past, then I know it's not guessing! Failing that, I want fake postcards from the future. Wanna write one? Tell me about the weather, any new tech, who is famous, and what the view looks like. Also - are there new types of dogs?

Our expert staff run a wide range of engaging creative writing and storytelling programs for young people of all abilities. All programs help people develop the skills and confidence to find their voice and shape the future.
